INTERNATIONAL SCIENTIFIC CONFERENCE
"RESIDENCY IN FAMILY MEDICINE: ACHIEVEMENTS, PROBLEMS AND PROSPECTS"

Venue: Aktobe, Republic of Kazakhstan

MAY 19-20, 2021
Dear conference participants!!!

On behalf of the conference initiator let me congratulate you on the start of the international scientific conference "Family Medicine Residency: Achievements, Problems and Prospects", dedicated to the celebration of the World Family Doctor Day. Today Marat Ospanov WKMU organized a unique opportunity for young specialists and medical experts to meet on a scientific platform not only for the traditional exchange of information, but also with the aim of creating and strengthening ties between doctors, teachers and residents of family medicine from all over the world.

This 2021 conference has a wide geography, and I want to welcome experts from Kyrgyzstan, Ukraine, Uzbekistan, Russia, Slovenia, Switzerland and of course our compatriots!

Despite the fact that the pandemic paralyzed normal processes in science, we found safe ways to continue our experience, maintain contact and strive to achieve common goals - training a competitive workforce, providing medical care at the PHC level and ready for continuous professional development.

One of the objectives of our conference was to bring together the interests of practical health care, medical education and science to improve the quality of training and expand the ability of family doctors to improve their practice, which determined our program.

I wish all the participants of the conference good health, prosperity, success in their labor and scientific activities! Good luck!

Conference initiator
Head of the Family Medicine Center and research in primary care
Head of the MES project "Building the potential of medical education technologies and research in family medicine in Kazakhstan"
Candidate of Medical Sciences, Associate Professor, Member of the AFPK
Zhamalieva L.M.
